5. GENERAL RATE REGULATIONS

5.1 Determination of Duration

5.1.1 For Direct Dialed and Operator Station Calls, usage measurement begins with the completion of the transmission of the called address message by the switch. The measurement of usage ends when the switch receives or sends a release message, whichever occurs first. For Person-to-Person calls, chargeable time begins when the designated party comes on the line, or when the caller agrees to speak with a substitute party.

5.1.2 Chargeable time ends when the connection is terminated.

5.1.3 Chargeable time does not include the time lost because of known faults or defects in the Service.

5.1.4 The Company bills for its interstate and intrastate toll services on a usage basis in 6-second or greater initial increments and subsequent increments of 6-second periods or greater, and it rounds up any fractional period. TERMS AND CONDITIONS

5. GENERAL RATE REGULATIONS (Cont'd)

5.2 Determination of Time of Day

5.2.1 Day, Evening, and Night/Weekend times are determined by the local time of the location of the rate center of the calling service point. Chargeable time for a rate period (e.g. 8AM-5PM) begins with the first stated hour (8AM) and continues to, but does not include, the second stated hour (5PM). The rate applicable at the start of chargeable time at the calling station applies to the call during the duration of the call that is applicable to that time period. If a call begins in one discount period and ends in another, the initial period discount applied is the discount in effect at the time the call is established. The charges for each additional minute of usage is the additional minute billing rate of the rate period in which the beginning of each minute occurs.

5.2.2 The time when connection is established is determined in accordance with the time - standard or daylight savings - legally or commonly in use at the location of the rate center of the calling service point, determines whether Day, Evening, Night or Weekend rates apply. This rule applies whether the message is sent paid or collect and is applicable to all Direct dialed and Operator Assisted calls.

5.2.3 The Evening rate applies to designated holidays unless a lower rate period is in effect.

5.3 Calculation of Billable Time

Calculation of billable time may not exceed the following guidelines:

5.3.1 The initial whole minute or fraction thereof is subject to billing at no more than the appropriate initial minute rate.

5.3.2 The subsequent seconds may be rounded in whole minute increments.

5.4 Calculation of Distance

All measured usage charges are based on the airline distance between rate centers associated with the originating and terminating points of the call. Airline distance is determined according to general industry practice using V&H Coordinates.
